EXPERIENCE

Automation & Analyst
Capgemini Polska Sp.z.o.o

June 2017 – April 2018 Krakow, Poland

- Participated in various Next Gen projects - automated services in multiple software platforms to eliminate procedural hurdles and improved performances
- Solved challenging issues with minimum effort and resource
- Simplified analysis by compiling data from several resources in one database, the process also captures information on real time from different locations to avoid data collation dependency
- Unstructured and semi-structured data are formatted and connect with data visualization tool.
- Implemented data cleaning, transforming, merging and reshaping data frames
- Created complete user feedback system in RPA
- Reduced the manual work, automated the data validation, automated mails on multiple phases and file management
- Provided an automated process to take the inputs, identify the inputs and created the payslip and to store the data into tracker file
- Involved with work flow developments and with sequence designing
- Creating standard, Scalable, Reliable process automation artefacts to replace human efforts
- Done several Application Testing using Selenium WebDriver with TestNG framework, Selenium Components & Automation, Functional & Compatibility Testing and Page Object Modelling

MOST PROUD OF
